Dear Mr. Durpos:

In response to your request, you are hereby granted an extension to complete construction for the reason(s) below:

According to your request, you will need additional time to procure funding and to construct Well No. 8. In addition, you have completed your water system plan, rehabbed Wells No. 1 and 2 and updated the system with a new reservoir. It appears you have made substantial goals in completing your project. Your request is for a reasonable and short period of time. We will grant you an additional five years to complete your project. If an extension is required beyond what is authorized, the project will be revaluated at that time for compliance with due diligence.

The new deadline to submit your Construction Notices are August 1, 2016.

WAC 173-173 describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements. Installation, operation and maintenance requirements are enclosed as a document titled "Water Measurement Device Installation and Operation Requirements".

Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.
